WHO WE ARE

Fortress Industries is a Darwin-based advanced manufacturing business positioned to support Defence and allied supply chains, maritime sustainment providers, fabricators and critical industries.

MISSION

Ensure that when it matters most, critical operations do not fail by delivering advanced manufacturing and precision-engineered solutions close to the point of need.

VISION

To be recognised as a trusted Northern Australian capability provider for complex, high-value fabrication and precision manufacturing.

CORE CAPABILITIES

**Advanced
Material
Processing**

**Precision
Components &
Assemblies**

**Maritime
& Defence
Sustainment
Inputs**

**Engineering to
Manufacture**

**Quality-Assured
& Controlled
Production**

**Surge & Overflow
Manufacturing
Capacity**

KEY DISCRIMINATORS

→ Point-of-need Darwin location

Close to Northern and remote operations

Execution and ← precision culture

accountability, problem solving and right-first-time delivery

→ Integrated advanced manufacturing

One accountable engineering-to-production workflow

Disciplined ← commercial model

Job selection, scope control and margin protection

→ Defence & allied supply-chain readiness

Quality, security and evidence pathways

Supply-chain ← strengthening

Supporting local providers rather than unnecessary competition

PRIORITY MARKETS

**Defence primes
& allied supply
chains**

Primary growth pathway

**Maritime
sustainment
& shipyards**

Northern sovereign capability

**Construction
& structural
fabricators**

Established base

**NT Government &
public safety**

Local strategic market

**Energy, resources
& critical
infrastructure**

Selective highvalue work

**Remote & regional
operations**

Tropical, harsh and time-critical environments

INDUSTRY & CAPABILITY NETWORK

MARKET PATHWAY

Protect the commercial base

Enter through primes

Grow into Australian and US Defence supply chains

ADVANCED MANUFACTURING PLANT

FORTRESS
INDUSTRIES

ART HEAVY-DUTY ROUTER

Large-format aluminium and selected composite processing; approximately 2.5 m x 12 m working area.

OCEANBLUE SHOT BLASTER

Controlled surface preparation of structural-steel sections and components.

KAWASAKI RA-15X ROBOTIC WELDING CELL

Repeatable automated welding of approved steel, stainless-steel and aluminium components.

METALTEK XB1200 BEAMLINE / COPING ROBOT

Automated cutting, drilling, coping and marking of structural sections within approved machine limits.

LVD 12 kW FIBRE LASER

High-speed precision cutting of sheet and plate for components, assemblies and production kits.

DURMA AD-R 40220 PRESS BRAKE

Precision folding and forming of fabricated components and assemblies.
