Overview

For over 40 years, Altrad has delivered specialist asset services across Australia's most critical infrastructure and Defence environments, supporting asset sustainment and operational readiness.

Altrad is an established project and asset services provider delivering integrated, full lifecycle solutions across construction, maintenance, life extension and decommissioning.

Operating in live and safety-critical environments, Altrad deploys multi-discipline teams to deliver compliant, reliable outcomes. A scalable, deployment-ready workforce supports time-critical requirements nationwide, maintaining continuity of critical assets.

Key Capability Areas

Marine and naval-grade painting and protective coatings

Fireproofing and passive fire protection

Insulation, cladding and asset preservation

Scaffolding and engineered access solutions

Rope access for complex and constrained environments

Mechanical and structural services

Inspection, testing and certification including NDT (Non-Destructive Testing)

Shutdowns, turnarounds and maintenance

Electrical, instrumentation and communications

Fabrication and SMP (Structural, Mechanical and Piping)

Discriminators

Experience working with Tier 1 EPC contractors and Defence primes

Cleared personnel ready for Defence deployment

Scalable national workforce for surge and sustainment

Delivery across major infrastructure and Defence programs

Focus on asset integrity, corrosion and life extension

Coatings, fireproofing, access, inspection and maintenance

Multi-skilled crews reducing interface risk

Proven delivery in live, high-compliance environments

Clients

BAE SYSTEMS

Projects

- Hunter Class Frigate Program
- Collins Class Submarines
- Armidale Class Patrol Boats
- Evolved Cape Class Patrol Boats
- Cape Class Patrol Boats
- Ichthys LNG Project
- Gorgon & Wheatstone LNG

Quality Standards & Accreditations

Certified rope access technicians

Registered Training Organisation (RTO)
TOID: 7131

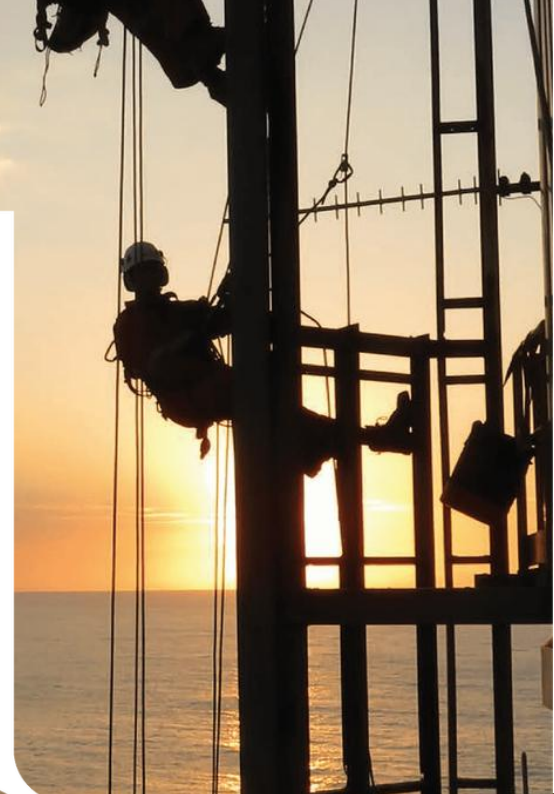

Asset Lifecycle Specialist

Integrated technical delivery partner with a proven track record across naval and high-risk infrastructure environments.

Integrated Asset Protection

Specialist coatings, fireproofing and integrated maintenance, supported by access and inspection services, delivered in live environments to protect and sustain critical assets.

Proven Delivery

- Hunter Class Frigate Program
- Collins Class Submarines
- Armidale Class Patrol Boats
- Major LNG and infrastructure assets

Sustained Performance

- Extends life of high-value assets
- Reduces long-term maintenance costs
- Supports operational readiness
- Flexible, deployment-ready workforce
