

Dräger develops and supplies market-leading safety and medical technology. In so doing, we protect, support, and save people's lives around the world.

"Technology for Life" is our guiding principle.

Founded in Lübeck, Germany in 1889 and in its fifth generation as a family-run business. Dräger was incorporated in Australia in 1963 and has established a physical footprint in every State of Australia and in New Zealand.

We proudly deliver a comprehensive local service, sustainment and support capability.

Protecting those, who protect us in Defence and Security.

- self-contained breathing apparatus
- closed circuit breathing apparatus
- airline systems
- escape systems
- self-rescuers
- masks & filters
- communication systems

PERSONAL PROTECTION

- chemical & gas suits
- helmets
- thermal imaging cameras

GAS & FLAME DETECTION

- explosive & toxic gases
- point & open path gas detection
- wireless gas detection
- flame detection
- control systems

ALCOHOL & DRUG DETECTION

- screening & evidential breathalysers
- oral fluid drug testing equipment
- vehicle alcohol interlock devices
- industrial & law enforcement

PORTABLE GAS DETECTION

- single & multi-gas detectors
- area monitors
- VOC & BTX measurement systems
- confined space entry equipment

ENGINEERED SOLUTIONS

- breathing air compressors
- breathing air filling systems
- fire training systems
- refuge systems
- decompression chambers

SERVICE

- on-site and field service
- workshop service

RENTAL & SAFETY SERVICES

- personnel & equipment rental
- project management
- CSE monitoring
- risk assessment and management

TRAINING

- Draeger product training
- workplace safety

QUALITY STANDARDS

- AS/NZS ISO 9001-2000
- ISO 14001
- ISO 18001
- NATA accredited laboratory

DISCRIMINATORS

- the only OEM of protection and detection systems with a sales and service team and a fully equipped workshop in Darwin
- Dräger products can be serviced almost anywhere in the world
- widely used by emergency services and in industry and enables interoperability in emergencies
- many Dräger products have a common user interface that simplifies training and ease of use in emergencies

Technology for Life

From Proven Technologies to Defence Capability

For decades, Dräger has protected people operating in hazardous environments through industry-leading detection and protection technologies.

Today, these proven capabilities are being adapted for defence applications including vehicle crew protection, collective CBRN protection systems and advanced threat monitoring.

Representative examples include:

BREATHGUARD® 2500

CONTINUOUS CO/CO₂ MONITORING SYSTEM

Continuous monitoring of CO and CO₂ levels to protect personnel operating in enclosed and partly enclosed vehicles and platforms.

SBL 100

COLLECTIVE PROTECTION

Overpressure ventilation for vehicles and shelters with 100 m³/h capacity in NBC protection mode.
